

Environmental Policy Statement

Orbital Climate Solutions Ltd is an environmentally aware Company and we expect our employees and clients to contribute where possible to protect the environment.

It is the policy of the company to adhere to BS 7750 (British Standards Environment Management Systems) as it applies to the activities, waste and operational by-products of the company.

The company and its staff are very committed to the highest environmental standards that protect land, water and atmosphere that are associated with its business operations. These standards include various legislation including Environmental Protection Act, Control of Pollution Act, contaminated Land Regulations and special waste Regulations.

More recently we acknowledge the EC directive (2002/96/EC) on the Waste Electrical Electronic Equipment (WEEE).

In acknowledgement of its obligations and importance to the subject, **ORBITAL CLIMATE SOLUTIONS LTD** has appointed external environmental consultants Bestsafe Ltd (Tel: 020 8361 0639) to advise on policy and operational matters.

The company shall undertake to:

- Implement environmentally friendly working practices.
- Seek designs, services and material that do not harm the environment.
- Train its workforce in environmental awareness and application of eco-friendly practices.
- Prevent or minimise the degradation of the environment in the course of its activities.
- Dispose all waste in a controlled, safe, responsible and within the recognised national procedures.
- Assist local community, statutory authorities, customers and clients to enhance the environment affected by the company's processes.
- Regularly review its practices, keep abreast of legislation and promote healthier ethos across all its projects.
- Adhere to the client's EMS (Environmental Management Systems) on their projects/premises.
- Provide Refrigerant Handling Training C&G 2079 to all Engineering Staff

The company has appointed a **Managing Director Mr Brett Strivens** to oversee, implement and monitor this environmental policy. Full details of his and other key staff responsibilities, are covered in the environmental procedures manual that also includes, enviro-hazards and the corresponding remedial procedures.

This policy will be reviewed annually and any significant changes will be communicated to all those concerned in the most appropriate manner which may include meetings, bulletins and noticeboards
